## What is claimed is:

- 1. A composite comprising a foamed polyester core material bonded to one or more structural skins, wherein the core material comprises a plurality of foamed strands, wherein there are substantially no inter-strand voids.
- 2. The composite of claim 1, wherein the core material is bonded between two structural skins.
- 3. The composite of claim 1, wherein the one or more structural skins comprise a structural sandwich composite.
- 4. The composite of claim 1, further comprising a resin bonding at least one of the skins to the core material.
- 5. The composite of claim 1, wherein the one or more structural skins comprises a thermoplastic polymer, a thermosetting polymer, wood, an inorganic material, or a metallic material.
- 6. The composite of claim 5, wherein the thermoplastic or thermosetting polymer comprises glass fibers, metallic fibers, inorganic fibers, or carbon fibers.
- 7. The composite of claim 1, wherein the foamed polyester core material comprises foamable polyethylene terephthalate.
- 8. The composite of claim 1, wherein the core material comprises a nucleating agent, a fire retardant, or a reinforcing agent.
